Subject: FW: Theory class Guest Lecturer

Hi Jen,

I wanted to share the below email. I think this would be a great opportunity for you!! I will be in Orlando for the Florida Organization of Nurse Executives (FONE) conference and unable to provide the below presentation.

As part of your continued mentoring, this would be a huge step for you and great networking with faculty at the UM School of Nursing. We have already worked together on various Nursing Professional Practice Model initiatives and I know you are well familiarized with Kolcaba's comfort theory. I think as a clinical nurse, you can add a nice perspective to the presentation from your everyday nursing care at the bedside. I would be happy to review the presentation with you that I used last year and guide you on how to tweak it to add the clinical nurse perspective, possibly a brief case scenario.

Let me know what you think. Excited to see your continued growth in leadership skills and nursing excellence!

Subject: Theory class Guest Lecturer

Hello Ms. Cordo,

Hope you are doing well.

I am teaching the class Concepts of Advanced Practice Nursing again in which the students are learning about nursing theories. I was very happy to have you come last year and share the theory that Nicklaus Childrens' Hospital utilized in your mission. The students enjoyed your presentation and it really helped to give a practical application to the theoretical aspect of this course. I have set aside November 7th, to invite guest from the community who incorporates a Nursing theory as their Philosophy of care to share the process and the importance of using theory to guide care. I would like to invite you again if your schedule permits you to come and share with us how Kolcaba is embedded within your organization. If you are unable to attend I would welcome if you could appoint someone from NCH to come on your behalf.

The class is on Tuesdays at 5:00 pm to 8:00 pm but we would only need 1 hour. It could be at the beginning of class or towards the ending. Please let me know if this is possible. This portion of the class will begin at 6:00 pm.

Greatly appreciate your consideration and time.

Best regards,

Brenda Owusu, DNP, ARNP, ANP-BC
